To-day has the doubtful honor of being the coldest of the season in New York. It was only one degree above zero at 6

of Jan. 10, but on the latter date it warmed up as the day advanced, while to-day the frigidity has remained so that at noon the thermemeters at Perry's and Hudnut's registered only 0 degrees above, while the official spirit on top of the Equitable Building had risen to 7 only, making Jan. 16 the coldest day in 1892 3.

This conduced to the making of more ice or the ponds and lakes, rivers and bays, and all tue forenoon several steam tugs were kept busy breaking up a fine coating of ice that had formed on the Kill von Kult from the Jersey to the Staten Island shore.

Meantime the lads and lassless of The Evrang World's three-State ballowick are painting richest roses on their cheeks by skating and sleighing, for there is splendid "slipping" on every decent road from Trenton to New London and Perth Amboy to Poughkeepsie. There is skating now on all the lakes within the Greater New York's boundaries.

The smaller lakes in the parks are being cleared of snow to-day, and about one hundred thousand skaters will enjoy the sport this afternoon and evening, while not less than one hundred thousand "best girls" will snuggle beside their "steadles" behind the spanking team, the bob-tailed mare or the old gray, a fluing up the avenues, the boulevards and the snowclad drives, with a snack of something hot and a drop of something hotter at the roadbouse that marks the further end of the sleigh ride.

There is another side to this story not so inviting, however. The ferrymen and those who ply in trues, steamers and other craft about New York Harbor look apprehensive as they discern the situation and the probabilities. charged by John Reithhold, of East New York avenue, with knocking him down
